
PROGRAM OVERVIEW

The Morehouse College–Los Alamos National Laboratory Education and Research Program was created to foster productive student/faculty research experiences and development of the future workforce at Los Alamos National Laboratory.

The program promotes sustained student-internship and faculty-collaboration programs and provides a stimulating research environment that will encourage students to pursue careers at Los Alamos National Laboratory.

PROGRAM COMPONENTS

- Summer internships at Los Alamos, on-campus research opportunities at Morehouse College, and long-term research experience for students while they are studying or after graduation are offered as part of the student research experience component.
- The faculty research component opens opportunities for summer research and long term sabbaticals for Morehouse College faculty members. It also provides small seed funding for new projects, including funds for student internships on campus, and facilitates the development of joint research programs between Morehouse College and Los Alamos National Laboratory. Faculty-staff exchanges are fostered through joint workshops and seminars.

STUDENT ELIGIBILITY REQUIREMENTS

Must have:

- proof of good academic standing from Morehouse College
- a strong desire to pursue a career in science and technology
- endorsement from the Dean of the Division of Science and Mathematics.

HOW TO APPLY FOR THE STUDENT PROGRAM

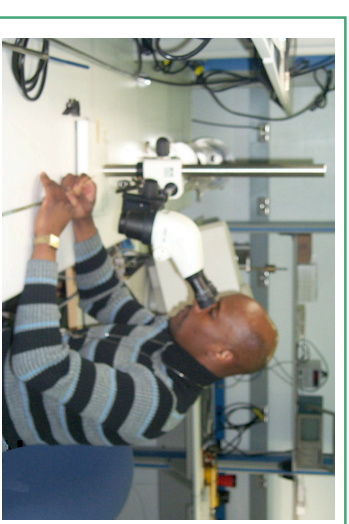

You can apply directly to Mr. Albert George II, Division Administrator, Division of Science and Mathematics, Morehouse College. Application materials include the following: a résumé, a current transcript, a 2-page essay of career objectives and research interests, a letter of endorsement from the Dean of the Division of Science and Mathematics, and two letters of recommendation.

STUDENT MENTORSHIP

All students selected for this program will be associated with the existing Student Program at Los Alamos National Laboratory. The students will work under the guidance of a mentor who will provide support and help for students to enjoy a positive research experience in the professional working environment.

RESEARCH EXPERIENCE FOR FACULTY MEMBERS

Los Alamos National Laboratory will facilitate identifying investigators and research programs that match the specific research interests of Morehouse College faculty members. The faculty members are encouraged to consider both summer research and longer-term sabbatical leaves at Los Alamos. They can submit small research grant proposals through the Division of Science and Mathematics with the expectation to develop extramural research funding opportunities.

Los Alamos National Laboratory, a world-class research facility, is located in the foothills of the Jemez Mountains in northern New Mexico. At Los Alamos, you can immerse yourself in 21st century science and make your contribution to research and development. Established in 1943 and managed by the University of California for the National Nuclear Security Administration of the Department of Energy, the Laboratory's mission is to provide scientific leadership for the nation and the world in the following diverse areas:

- Accelerators
- Advanced Concepts
- Astronomy
- Biology
- Chemistry
- Computing
- Defense Sciences
- Energy
- Engineering
- Environmental
- Explosives
- Geology
- /Geophysics
- Genomics
- Hazardous Waste
- Manufacturing
- Materials
- Mathematics
- Medicine/Health
- Modeling/Simulation
- Nonproliferation
- Nonlinear Studies
- Nuclear Weapons
- Physics
- Space Sciences
- Superconductivity
- Testing and Evaluation
- Theory
- Nontechnical
